

CMMS SOFTWARE FOR TRANSPORT AND LOGISTICS

DIMO Maint uses digital technology to improve management the performance of your maintenance

Concerned about customer satisfaction, your carbon footprint and optimal profitability, the maintenance of your vehicle fleet and infrastructure is vital in your business.

Among your priorities as a player in the transport and logistics sector, you must offer the best operating conditions for the resources made available, guarantee the safety and satisfaction of users, ensure the availability of equipment, compliance with legal obligations, and optimize costs.

Perform

Manage all your internal and external maintenance activities.

Secure

Monitor and comply with regulatory standards to ensure user safety.

Analyze

Have the relevant indicators to monitor the activity of your fleet, equipment and infrastructure as closely as possible.

Save

Control direct maintenance costs (asset failures, downtime, resources...)

“

The CMMS is used for preventive and corrective maintenance and the follow-up of more than twenty contracts. The airport must assure the manufacturer after building turnover, that maintenance is carried out according to the recommendations of suppliers and installers in order to be able to engage the guarantee. The use of CMMS offers a negotiating power to merge several contracts and optimize the budget devoted to maintenance tasks.

Saif BEN AMMAR, Maintenance Director at RAVINALA AIRPORTS

”

DIMO Maint, the CMMS adapted to the needs of transport and logistics

Guaranteeing the maintenance of the availability and reliability of vehicles, equipment and infrastructure, the DIMO Maint CMMS plays a key role in the quality and continuity of the service provided:

- Easily identify and locate your equipment, vehicles and infrastructure in a tree structure
- Have a maintenance schedule to improve the availability and lifecycle of your assets
- Optimize the coordination of material and human resources
- Receive alerts for each element of your fleet (odometers, meters, etc.)
- Generate detailed maintenance reports and optimize your fleet costs
- Benefit from a CMMS accessible everywhere: Android and iOS mobility (photos and QR Code)
- Improve your management by connecting your CMMS to your existing information system (fleet management software, fuel management, logistics solution)
