

SIMPLIFY THE MANAGEMENT OF YOUR INSPECTIONS, AUDITS, AND QUALITY MONITORING!

As a specialist in industrial digitalization, INSPECTO is revolutionizing quality management with a 100% digital process. INSPECTO DQI - Digital Quality Inspection - integrates innovative features, real-time collaborative management, remote inspections, detailed statistics, and complete project traceability.

INSPECTO and DIMO Maint, experts in industrial maintenance, offer a comprehensive and innovative solution that enables technical managers to efficiently conduct inspections on-site or remotely and trigger maintenance activities.

THE BENEFITS

By connecting INSPECTO with DIMO Maint's CMMS, you get the ultimate solution to manage, simplify, and enhance the quality of inspections and maintenance operations:

- 
Save time on inspection and maintenance tasks.
- 
Improve maintenance inspection quality through better traceability and increased frequency of preventive maintenance.
- 
Reduce travel and associated costs by up to 50% for multi-site companies, allowing remote inspections and maintenance tasks.
- 
Eliminate costs from uncontrolled failures by ensuring technicians and managers remain connected and alert at all times.
- 
Anticipate equipment failures and provide rapid and effective corrective recommendations through machine learning modules.
- 
Benefit from near-instant issue resolution with real-time inspection management and total traceability.

FEATURES

Project Tracking

- Conduct live/synchronized or offline inspections.
- Manage inspections at every stage of a project, from order to delivery, through an intuitive dashboard.
- Fill out digital inspection forms and document all activities.

Collaborative and Controlled Documentation

- Capture and instantly share photos and videos among project members.
- Archive documents in a centralized, shared, and secure manner.
- Directly access and review project history.
- Automatically generate and share intervention reports.

Audits and Reviews

- Track non-conformities and their resolutions.
- Electronically sign documents.
- Record generated media data.

Risk Management

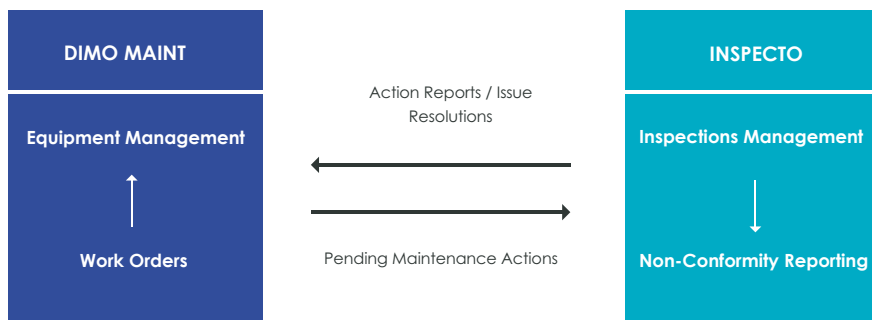

- Propose corrective actions.
- Automatically generate inspection reports.
- Send alerts in case of anomaly.

Statistics and Supplier Evaluations

- Conduct statistical analyses.
- Integrate industrial instruments, such as endoscopes, for precise and rapid defect detection.

STANDARD REQUIREMENTS

- GMAO DIMO Maint MX
- INSPECTO

inspecto

INSPECTO SAS has developed a specialized software for inspections, audits, and quality control. It fully digitizes the inspection process, enabling on-site or remote execution without requiring a physical inspector visit. A computer, smartphone, or tablet is all that's needed.

INSPECTO SAS offers a dual service: first, consulting to analyze business challenges and scope, and second, a digital solution that aligns with business workflows. With INSPECTO, inspection processes are efficient and compliant with the highest industry standards. The company has been recognized with the French Tech and Coq Vert labels by BPI France for its positive environmental impact and CO2 reduction efforts.

**Dimo
Maint**

As a subsidiary of DIMO Software, DIMO Maint has specialized in maintenance management software for over 25 years. With 4,000 clients worldwide, DIMO Maint is a major player in next-generation CMMS solutions, both cloud-based and on-premises.

DIMO Maint supports the digital transformation of maintenance functions across organizations, from SMEs to large multinational corporations, in all industries. Its CMMS solutions are mobile, scalable, user-friendly, and easy to deploy, making maintenance management more efficient and secure. Fully interoperable, they streamline communication within and between service departments.
