

CMMS SOFTWARE FOR MINES, QUARRIES AND PUBLIC WORKS

DIMO Maint uses digital technology to improve the performance of your maintenance management

Companies that operate in the public works, mines and quarries sector face very specific issues that the maintenance team must know how to handle. Sometimes, mines and work sites are remote and access to both human and material resources is complicated. This leads to issues surrounding response times relating to part availability, access to documentation during field repairs, the safety of repairs, meeting legal obligations, etc.

Perform

Increase the availability and reliability of your equipment, vehicles and machines by ensuring that your maintenance plan is strictly followed and anticipating breakdowns.

Secure

Control risks and guarantee your regulatory compliance (periodical general inspection, etc.)

Protect

Protect human health and the environment and facilitate the energy transition.

Innovate

Enter the era of online maintenance and oversee your maintenance management. Simplify your technicians' everyday lives when roaming!

“

To guarantee the smooth operation of your infrastructure and quarry and mine site machine inventory, CMMS remains an essential tool to facilitate work every day, both for managers and technicians.

”

DIMO Maint, CMMS adapted to the needs of mines, quarries and public works

DIMO Maint CMMS provides suitable solutions to the constraints faced by companies that manage and operate mines, quarries and public works.

- Easily identify and locate your equipment, vehicles and infrastructure in a tree structure
- Have a maintenance schedule to improve the availability, reliability and life cycle of your assets
- Optimise the coordination of material and human resources
- Improve the management of spare parts stock
- Receive alerts for items in your inventory (meter readings, hours of operation, etc.)
- Benefit from a CMMS that can be accessed from anywhere: Android and iOS mobility (photos and QR Code)
- Improve your management by connecting your CMMS to your information system in place (purchasing, accounting or ERP software, IoT, machine planning solution, etc.)
