

MANAGEMENT OF YOUR EQUIPMENT FLOWS

Healthcare facilities face a common challenge: the **complexity of managing medical equipment flows**.

In this context, the challenges are numerous, including **adjusting the inventory** according to actual needs, **reducing annoyances** for healthcare staff, and ensuring **rigorous maintenance** to avoid the underuse of equipment.

"Superwyze addresses these challenges by **prioritizing user needs**. It offers an **intuitive** and **comprehensive** interface, along with the **best available technology**, to meet demand and provide a seamless experience. When integrated into a CMMS like DIMO Maint's, the Superwyze solution **optimizes equipment flow management**."

THE BENEFITS

Accurate and immediate inventory management

Operational time saving

Anticipation of maintenance campaigns

A park adapted to the right needs

Better ressources allocation

Strengthening security

All these benefits without usage constraints : no maintenance, no batteries to replace, no configuration required, no updates to perform, all with waterproof sensors compatible with all types of equipment.

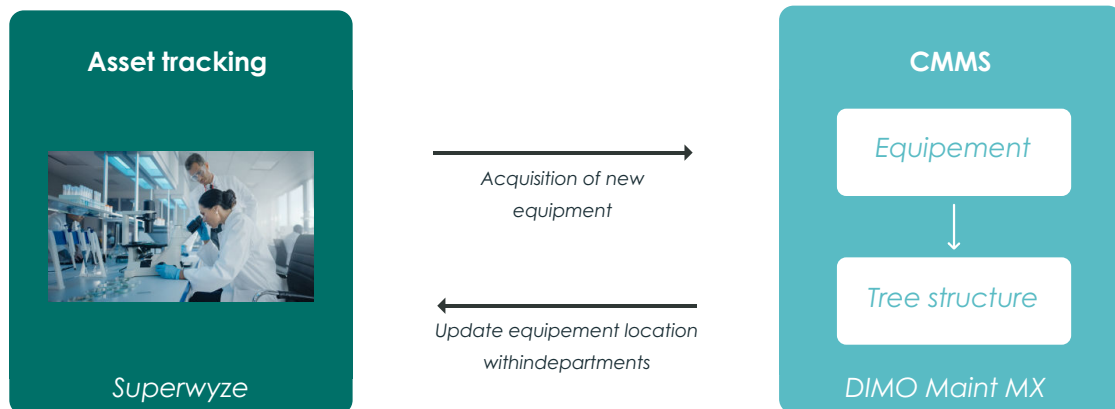

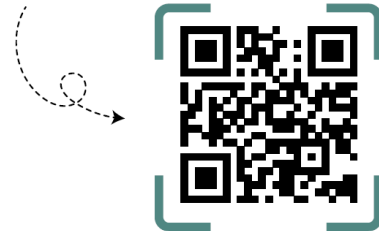

FEATURES

- Location on plan and real-time list of equipment (filter by family, model, location, and availability)
- Inventory can be checked remotely in just a few seconds
- Creation of personalized alerts (equipment leaving the building, moving from one department to another, change in device availability, etc.)
- Analysis of usage rates : monitoring of equipment or equipment families

STANDARD REQUIREMENTS

- CMMS DIMO Maint MX
- Superwyze

To find out more

Superwyze is a Lyon-based startup specializing in software solutions with a focus on innovation and the integration of connected objects (IoT). The company provides innovative solutions by integrating advanced technology with the smallest sensors in the world, all complemented by an intuitive and comprehensive interface.

Superwyze technology enables various use cases such as monitoring equipment flows, medical gas cylinders, patients, and thermometry.

Superwyze collaborates with your team to develop your project in perfect synergy.

A subsidiary of DIMO Software, DIMO Maint has specialized for over 28 years in the development of maintenance management software. With 2,000 clients worldwide, DIMO Maint is now a major player in the market for next-generation CMMS solutions, both cloud-based and onpremise.

DIMO Maint supports the digital transformation of maintenance functions for organizations, ranging from SMEs to large international companies across all industry sectors. Mobile, scalable, userfriendly, and easy to deploy, DIMO Maint's CMMS solutions simplify and secure the daily operations of maintenance teams. They are interoperable, promoting communication within and between departments.
